

HERNDON-RESTON FISH, INC.

FINANCIAL EDUCATION WORKSHOP

Given by Herndon-Reston FISH, Inc.

Free Seminars on Managing your Finances

- ❖ Learn basic budgeting strategies
- ❖ Learn why good credit is critical to your spending power

Myth #1 *I'm no good with money.*

Being good with money is not something that you are born with, nor is being bad with money, it's something that you learn and can overcome!

Myth #2 *Why should I make a budget when my family won't go along with it?*

Creating a spending plan puts your finances in black and white – or red as the case may be! Either you have the money to buy or you don't. A spending plan will help you and your family prioritize and achieve your goals.

Myth #3 *If I bury my head in the sand, the debt will all go away.*

As a matter of fact, it won't go away on its own. If you're in debt already, it may get worse before it gets better. You need to know where you stand financially before you can take action to get out of it.
